Forecast for Monday 29 Nov 2021

Weather: Partly cloudy overnight with clear spells and a sharp frost, strong northerly winds will enhance the significant windchill overnight. A dry, bright and frosty start to Monday morning but becoming increasingly cloudy during the morning, as milder air starts to push in from the west during the afternoon. It will become quite dull by late afternoon with light rain possible. Precipitation will mainly be light and patchy with a few drier spells during the evening and remaining quite dull.

Chance of cloud free mountain/hill tops above 600m: 95% in the morning but patchy low cloud will develop around northern hills in the early afternoon. The lower cloud will become more broken and spread east in the afternoon.

Visibility: Good visibility at daybreak with views around the Brecon Beacons however it will turn cloudier and duller towards early afternoon especially in the west. By mid afternoon 60% chance of cloud free tops and the best chance of any brightness in the east. Cloud will become broken above 500m in the afternoon in the west, perhaps more scattered around 600m in the east. Visibility will become poor light and patchy rain later in the afternoon.

Meteorologist's View

Bitterly cold at first in northerly winds but wind chill easing a little later in the day despite strong winds by later afternoon.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Sun 28 Nov 2021	0mm	3mm	10.2mm

Forecast for Tuesday 30 Nov 2021

Weather: A dull and cloudy morning with outbreaks of light and patchy rain or drizzle at times. A few brighter spells may be possible in the east. Rain will intensify in the evening with some heavier periods accompanied by strong winds, perhaps gales by evening.

Maximum wind: West or southwesterly 30mph gusting 35-40mph

Chance of cloud free mountain/hill tops above 600m: 20-30%, expected to be quite cloudy at low level associated with rain. Perhaps a few brighter periods in the afternoon in the east.

Visibility: Moderate or poor for most of the day in light rain or drizzle and then heavier rain later. Cloud bases will be broken from 400m above in the north and west, perhaps more scattered from 500m around southern tops.

Temperature: **Valleys:** Plus 10 Celsius.
At 600m: Plus 6 Celsius.
Freezing level: Above the summits.
